

Myeongjin Lee

[Google Scholar](#) | [LinkedIn](#) | [Email](#)

RESEARCH INTERESTS

Deep Learning, Virtual Garments, Physics Simulation, Computer Graphics

EDUCATION

Ph.D. in Korea Advanced Institute of Science and Technology (KAIST) Specialization: Computer Graphics ; Advisor: Sung-Hee Lee	2023.03 - present
M. S. in Korea Advanced Institute of Science and Technology (KAIST) Specialization: Computer Graphics ; Advisor: Sung-Hee Lee	2020.09 - 2023.02
B. S. in Yonsei University Specialization: Industrial Engineering, Atmospheric Science	2016.03 - 2020.08

PUBLICATIONS

- Hybrid Retrieval-Regression for Motion-Driven Loose-Fitting Garment Animation [\[Page\]](#)
Myeongjin Lee, Emmanuel Ian Libao, Sung-Hee Lee
Pacific Graphics (PG) 2025 - Conference Track, **Eurographics Proceedings Series (EGPS)**
- MeshGraphNetRP: Improving Generalization of GNN-based Cloth Simulation [\[Page\]](#)
Emmanuel Ian Libao, **Myeongjin Lee**, Sumin Kim, Sung-Hee Lee
Conference on Motion, Interaction and Games, 2023, **Association for Computing Machinery (ACM)**, 2023
- CoEM: Contrastive embedding Mapper for Audio-Visual Latents [\[Page\]](#)
Gihun Lee, Kyungchae Lee, Minchan Jeong, **Myeongjin Lee**, Se-Young Yun, Chan-Hyun Youn
Korean Institute of Information Scientists and Engineers, (Journal Track) 2023, 80-86, **Journal of Korean Institute of Information Scientists and Engineers (JOK)**, 2023
- Learning-Based Simulation of Loose-Fit Garments [\[Page\]](#)
Myeongjin Lee and Sung-Hee Lee
Korea Computer Graphics Society 2023, 123 - 124, **Journal Of The Korea Computer Graphics Society**, 2023

RESEARCH PROJECTS

- Robotic Arm Manipulation for Complex Garment Reconstruction and Organization, 2025 -**
National Research Foundation of Korea
Advancing autonomous garment manipulation by developing generative and visuo-tactile methods for state estimation, registration, and organization of highly deformable garments.
- AI Industry Convergence Project, 2024**
Vdigm Corporation
In collaboration with industry, successfully trained and demonstrated a neural network model on industry-supplied 3D garments.
- Open eXtended Reality Project, 2023**
Korea Institute of Science and Technology Information
Applied skinning-based simulation technology to simulate clothing based on the user's avatar and integrated it into the team's Unity project.
- Real-time Virtual Garment Deformation Project, 2021-2022**
NCSoft Corporation
Research and development of a neural network-based, motion-driven, loose-fit garment simulator.

TALKS

- Tech Talk: Insights on Apparel & Fashion with R3iLAB** [\[Page\]](#)
Korea Advanced Institute of Science and Technology (KAIST), Daejeon, South Korea, November 2023

COMMUNITY SERVICE

Reviewer

Transactions on Visualization and Computer Graphics, 2024

Conference Volunteer

Pacific Graphics, 2022

Extracurricular Activities

- Student Counselor for Graduate Student Peer Counseling Program. 2023 - Present.
- Tutor of Math, Physics, and Earth Sciences in Korean SAT for middle and high school students, 2017 - 2020.

ACADEMIC COURSEWORK

- **Data Analysis and Machine Learning:** Statistical Data Analysis, Data Mining Theory and Applications, Musical Applications of Machine Learning, Programming for AI
- **Computer Graphics and Augmented Reality:** Computer Graphics Theory and Applications, AR Projects
- **Mathematics & Physics Foundations:** Advanced Calculus, Linear Algebra, Probability Models, Physics and Dynamics for Atmospheric Sciences, Computational Fluid Dynamics

AWARDS

- 2nd Prize for Panel Data Analysis Competition, 2019
- Selected as a Government Scholarship Student, 2020 - 2022
- Selected as a Scholarship for the Convergence of Metaverse Specialist Program, 2023 - present

TECHNICAL SKILLS

- Programming Languages: Python, Matlab, C#, CMake
- Operating Systems: Windows, Linux
- Libraries: PyTorch, OpenGL
- Professional Tools: Docker, Blender, Maya, Github
